Post-Operative Mole Removal Instructions

1. Gently clean area with equal parts peroxide and water. Lightly pat dry.
2. Gently apply a thin coating of bacitracin on the wound for the first two (2) days.
3. On the third day following treatment discontinue the use of bacitracin and let the area dry out.
4. DO NOT pick at or remove any scab that is forming.
5. DO NOT wear any make-up on the area of treatment for the first week.
6. AVOID sun exposure for the first two (2) weeks and following that make sure to use plenty of sunscreen SPF 45-50 for the first year to prevent any soft tissue damage.
